## **Proposed Solution:**

Project team shall fill the following information in the proposed solution template.

| S.No. | Parameter                                | Description  |
|-------|--|--|
| 1.    | Problem Statement (Problem to be solved) | Citizens and customers often face difficulties in registering complaints, tracking their status, and receiving timely resolutions due to the lack of a centralized, user-friendly complaint management system.                                 |
| 2.    | Idea / Solution description              | A digital platform that allows users to register complaints online, track their progress, and interact with assigned agents—streamlining the resolution process and ensuring transparency.   |
| 3.    | Novelty / Uniqueness                     | <ul> <li>Role-based access: User, Agent, Admin</li> <li>Real-time complaint tracking and chat support</li> <li>Automated complaint assignment</li> <li>Lightweight, responsive UI for all devices</li> </ul>                                   |
| 4.    | Social Impact / Customer Satisfaction    | <ul> <li>Increases public trust in service delivery</li> <li>Reduces manual processing time and errors</li> <li>Empowers users with transparency and accountability</li> <li>Improves public service quality through feedback loops</li> </ul> |
| 5.    | Business Model (Revenue Model)           | <ul> <li>Subscription fees for enterprise clients</li> <li>Data insights dashboard (premium)</li> </ul>  |
| 6.    | Scalability of the Solution              | <ul> <li>Can be scaled across departments, cities, or organizations</li> <li>Easily integrable with APIs of helpdesk or CRM systems</li> <li>Multi-language and regional support to reach wider user base</li> </ul>                           |
